## ABOUT

Final-year engineering student passionate about Artificial Intelligence, I specialize in building AI-powered systems using LLMs, RAG, and machine learning models. I combine this with strong Full-Stack development skills to design intelligent, scalable, and impactful applications.

## EDUCATION

|                                                                                                                                                                                                                                                                                                                      |                                                                                                                |
